## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 10 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by German Patent (4223956).

The German patent teaches a process for preparing a restarting spinning process after interruption (Figure 1) comprising feeding an end of an already spun thread through an airjet (5) in a direction opposite the direction of twisting, temporarily positioning the end in the thread storer (35), preparing the spun thread for restarting by removing as waste an end portion of the spun thread (via suction present in 35), and transporting the end using delivery rollers (12, 12') from the thread storer in the operational direction of the spinning arrangement.

### ***Allowable Subject Matter***

3. Claims 14-18 are allowed.
4. Claims 11 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. The following is a statement of reasons for the indication of allowable subject matter:  
Claim 14 and its dependent claims are found to be allowable because the prior art of record

Art Unit: 3765

neither teaches nor reasonably suggests the recitations found therein, including the use of a nipping line which creates a specific resultant thread end.

*Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Boehnke (6971226), Rohner (4653258), and Fujiwara (5052173) all teach what is well known in the art.
